

GOOD APPETITE !

Bio-active marine peptides originating from shrimp

The features and benefits of Pepsea 5

- ✓ Highly concentrated bio-active peptides (38-40% protein)
- ✓ Year-round availability/constant & reliable supply
- ✓ Improving sustainability index of feeds (not part of FIFO)
- ✓ Cost effective
- ✓ Easy to use
- ✓ High attractability & palatability
- ✓ Improved feed intake
- ✓ Improved growth using low fishmeal feeds
- ✓ Improved gut & liver health

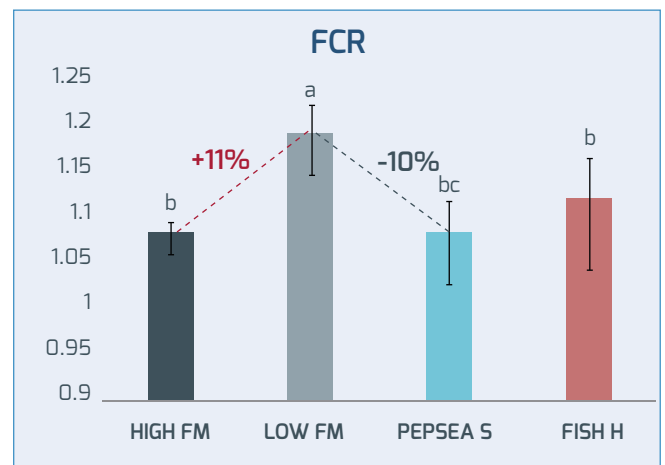

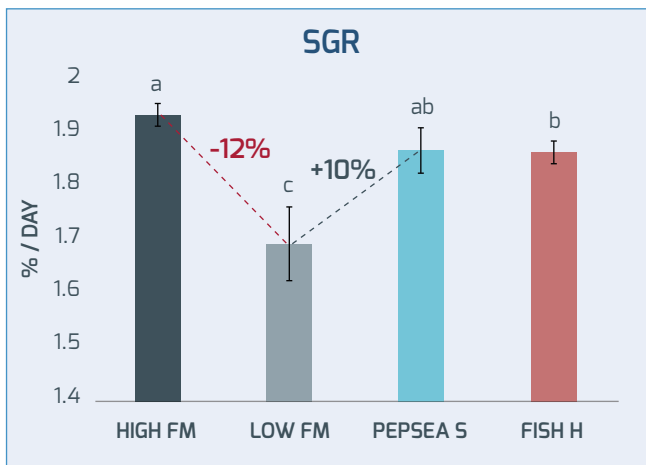

Physical characteristics	
Appearance	light viscous liquid
Colour	dark brown

Analytical characteristics				
Composition	Moisture Max. 50%	Protein Min. 38%	Lipids 1-5 %	Ash Max. 10%
Amino Acid profile (as % product)	lysine	2,41	proline	2,75
	threonine	1,34	glycine	3,60
	isoleucine	1,43	alanine	3,77
	methionine	0,61	valine	1,93
	cystine	0,06	leucine	2,30
	aspartic acid	3,20	phenylalanine	1,48
	serine	1,27	histidine	0,56
	glutamic acid	5,53	arginine	2,25
Molecular weight distribution % (Dalton)	< 1000 80%		< 3000 95%	

RESULTS

Seabream growth trial

- **Application** Fish & shrimp feed 2-10 kg/MT
- **Packaging** 200L drums, 1000 L IBC
- **Shelflife** 12 months after production date stored in a cool and dry environment, in the original packaging

Consult our aqua experts for specific recommendations per species.
